linkedin.com/in/oznuroznur/  
github.com/oznuroznur

With hands-on experience building fullstack applications from scratch, with a strong focus on backend systems and architectural design. Proficient in technologies like Express.js, PostgreSQL, Prisma, and React Native, and familiar with DevOps practices such as NGINX configuration and server setup. Currently seeking backend-focused opportunities after independently developing B2C products across both mobile and web platforms.

## Work Experience

### #Software Developer

March 2025 - Present

#### Vatan Computer

- Gained hands-on experience in **.NET MVC architecture**, contributing to backend improvements by debugging controller-service-model flows and fixing logic-level issues.
- Delivered key features including the **PC Build Wizard**, **product comparison drawer**, **AJAX filtering**, and **store locator**, while supporting core flows like login and messaging.
- Migrated the entire frontend framework from **Bootstrap 3 to 5**, and maintained legacy modules using **jQuery**, **SCSS**, and **JavaScript**.
- Built reusable **utility functions** and integrated **Google Tag Manager** for user behavior tracking and analytics.

### #Software Developer

2023-2025

#### Ideon Information Technologies

- Implemented real-time communication features using **WebSocket** and collaborated on **API integration**, debugging **backend-related logic** and contributing to **data structure** decisions.
- Developed mobile applications using **React Native** and **Expo** and built web interfaces with **Next.js**, **TanStack Query**, and **Tailwind CSS**, delivering responsive and user-focused UIs.
- Worked within **agile** teams to deliver production-ready mobile and web solutions with an emphasis on scalability and maintainability.

### #Intern Engineer

2022-2023

#### Mebant Insulation and Tape Industry INC.

- Contributed to an internal **.NET**-based admin panel project with teammates.

### #Intern Engineer

2021-2022

#### Eskisehir Industrial Zone Directorate

- Gained experience in **SQL Server** through data normalization tasks.

## Skills

## Personal Projects

**CoffeeNest** - Yelp-style B2C café review platform fully designed, architected, and developed end-to-end. Includes PostgreSQL database design, Express.js + Prisma backend, Swagger documentation, mobile app (React Native + Expo), and marketing site (Next.js). Deployed on VDS with PM2, NGINX, and SSL.

**Mixograph** - Self-initiated cocktail recipe app, fully built from scratch. Includes automated web scraping, PostgreSQL database schema, Express.js backend with Prisma, and a mobile UI in React Native (Expo). Integrated n8n for real-time syncing and update automation.

## Work Projects

**Vatan Bilgisayar Website** - High-traffic e-commerce site; contributed to backend logic and frontend migration using **.NET MVC**, **Bootstrap 5**, and **jQuery**.

**Foodion** - AI-powered mobile app for personalized recipe suggestions and diet planning. Built using **React Native (Expo)** and **Tailwind CSS**.

**Nyon** - Peer-to-peer car rental app with socket-based messaging and offer management. Developed with **React Native (Expo)**, **Tailwind CSS**, and **WebSocket** integration.

**Call Center CRM** - Planning and management system for certification firms. Developed using **Next.js (frontend)** and **Java Spring Boot (backend)**.

**GSTC Audit App** - ERP-style web platform for planning and tracking certification audits. Built using **Next.js** and **Spring Boot** with advanced calendar logic.

**Leon Integra** - Multilingual animated portfolio website for a US-based client, developed with **Next.js**, **Tailwind CSS**, **i18n**, and **Framer Motion**.

**Royalcert** - Multilingual corporate website with admin panel and content management; built with **Next.js**, **Tailwind**, and **Framer Motion**.

**Durko** - Bilingual corporate website with blog editor and content panel, developed with **Next.js**, **Tailwind CSS**, and **next-intl**.

**Order Tracking App** - Table/stock/order management app for restaurants; built for web (**Next.js**) and mobile (**React Native + Expo**).

**Hukukcun** - Mobile appointment app for booking video meetings with lawyers. Built with **React Native (Expo)**, **Tailwind CSS**, and **Next.js**; includes admin panel.
